### Local News.

Mrs. F. W. Brown returned last week from a visit to friends at Calgary.

Divine service at All Saints' on Sunday at 7.30 p.m. Preacher, Rev. A. W. Swayne.

Mrs. J. M. Mathers with her two children leaves on Tuesday to visit friends in the east.

A. F. Werts represented the Bow Island brothers at the session of the Grand Orange Lodge held at Red Deer this week.

A number of old-timers of the district spent a very pleasant evening on Friday last week with Mr. and Mrs. A. Whitney.

Union Sunday school is held in the Presbyterian church every Sunday at 11 a.m. Methodist church service at 7.30 p.m. Chas Bishop, pastor.

The ferry at the river has been completely overhauled this week and put into a thorough state of repair by Frank Brophy.

F. W. Harding accompanied W. A. Jones of Prosby on a trip to the north country last week. Mr. Jones has purchased a farm near Olaton, Alberta.

The gross postal revenue of Bow Island for the year ending March 31st, 1914, as set out in the annual report of the Dominion Post-office department is \$2848.50.

F. W. Brown and T. R. Blaine received their commissions this week as lieutenants in the 21st Alberta Hussars, two troops, of which it is proposed to raise in Bow Island.

Mrs. E. Newton whilst en route from Soud Point, California, to Maple Creek, Sask., stopped off here this week to spend a few days with Mrs. W. P. Cotton.

J. H. Lyons of Taber, who has been spending a few months visiting friends in the east, attended the Council meeting on Thursday night in his official capacity as town solicitor.

R. H. Lakenby is expected to leave his week for Chicago to be medically treated for cancer. We trust the operation may be successful and that our chief will return fully restored to his usual state of good health.

The sale by auction of the north-east of 410-11 on Saturday, 13th inst., resulted in only one bid, and the property was withdrawn. The sale on Wednesday, 17th inst., of the south-west of 22-10-10, situated about five and a half miles east of Bow Island, drew one bid of \$1250. The reserve price was \$1600 and consequently no sale resulted.

Farmers who have not as yet procured their feed grain from Bow Island should make their application forthwith. Quite a number of orders given out by the relief agent have not been turned in, and it is of the utmost consequence that these be returned without further delay and thus release the cars containing the grain. Farmers failing to respond promptly run the risk of "getting left."

A few days of warm spring like weather this week were heartily welcomed and the disappearance of the huge heaps of snow throughout the town very much appreciated. The country, however, is still covered excepting in a few places where the higher ground is gradually making itself visible.

As a result of the thaw the farmers are finding it increasingly difficult to haul out their loads of hay and grain.

Easter Millinery Opening.—Mrs. Bruce will be pleased to have you call and inspect the new styles in spring millinery on Thursday, April 1st.—Adv.

A meeting of the Young People's Society will be held in the Presbyterian church on Wednesday, March 24th, at 8 p.m. An address will be given by Rev. W. R. Brooks on missionary work. All welcome.

SEED GRAIN CANNOT BE SOLD.

The Department of the Interior is taking prompt steps to trace and obtain convictions against persons fraudulently converting to other uses than for the purpose for which it was obtained of seed grain advanced by the Dominion government. The R.N.W.M.P. have this matter actively in hand and a heavy penalty has been provided for in the amended Seed Grain Act and any person or persons found to have sold the grain, or used it for any other purpose than that set forth in the application form will be rigorously prosecuted.

### MISSIONARY LIFE IN JAPAN.

An illustrated lecture was given in All Saints' church on Tuesday evening by the Rev. C. B. Shortt, a missionary who has spent the past five years in Japan in connection with the Canadian Church. There was an excellent attendance and considerable interest was evinced in the many beautiful pictures thrown upon the screen. The rev. gentleman's knowledge of his subject was most thorough and his descriptive remarks about the customs and life of the Japanese was both interesting and instructive.

Mr. Shortt is spending a vacation of nine months in Canada, at the end of which period he will return and resume his work in Japan.

### MASQUERADE BALL.

The masquerade ball given on Wednesday evening last (St. Patrick's Day) by the Bow Island orchestra was an extremely well arranged affair and proved very enjoyable. As is usually the case with this orchestra, the music was of the very best, and the dancers entered into the fun with great zest and energy. About fifty persons wore costumes, and some of them had displayed considerable ingenuity in their make-up. The prize for the best fancy costume for ladies was awarded Mrs. J. H. Patterson for an admirable characterization of "Night"; Miss Manning of Burdett won the prize for the best comic dress for ladies. T. R. Blaine as a "Son of Erin" won the prize for best gents' costume, and Dr. J. H. Patterson the prize for the best comic.

An ice-cream social, under the auspices of the Methodist Ladies' Aid, will be given in Magdalen's skating rink on Thursday, March 25th. An excellent programme is being arranged, among the chief items of which will be selections by the Mandolin Club, comic songs by Wilfrid Henderson (in descriptive attire), a pleasing sketch by the Dramatic Club, piano-forte music by Miss Taylor and Lucille Fuller, and in addition several other items, making the programme a very interesting one throughout. An admission fee of 25c will entitle purchaser to the full entertainment, and to a plentiful supply of ice-cream and cake.—Adv.

SAY! YOU, MR. FARMER!

## Mail Order Plow Shares.

NOTHING DOING! We keep these in stock to fit any Plow, and you can't beat our prices.

SPECIAL PRICE ON LOTS OF TEN OR MORE.

Be a King and Support Your Own Town.

### FORMALDEHYDE

In Sealed Bottles 25c. per lb.

BOW ISLAND HARDWARE CO. LTD.

### Exceptional Value.

FORMALDEHYDE  
SULPHUR  
STYRCHINE  
SURE DEATH

BLUE STONE  
STOCK FOOD  
GOPHERICIDE  
KILL-EM-QUICK

## EGG DYES FOR EASTER.

EASTER POSTCARDS.

THE BLAINE DRUG & BOOK CO.

### District News.

#### HAYCROFT AND SELZ.

Among those on the sick list recently were Gladys Shogren and Ralph Fisher, who is being relieved by Mr. Hanning.

Father Heibel did not put in an appearance, consequently no service was held on the 15th at the Roman Catholic church. The abandonment of the service was probably due to the bad roads.

Dr. Patterson of Bow Island was summoned on Saturday to the residence of Glen de Pury on account of illness of the latter.

Mr. Arthur Mistry favored us with a very original collection this morn-

compilation) at our literary entertainment Friday evening.

School cheques for teachers' salaries arrived on Tuesday, the government advancing the teachers \$7.50 per day for twenty days in January and nineteen days in February, the balance of teachers' salary being paid out of government grant in July.

Mr. T. C. Thompson, secretary of Soles D. No. 277, desires it to be remembered that he is an American from North Dakota, and not a Russian from Soles Russian colony. By a mistake his name as well as that of Jacob Gratz was placed on the list of those who emigrated from Odessa, Russia, to the Soles district.

Mr. John Myers, brother of Will Myers, is indisposed at the residence of Mr. Fortune.

## BATTLES OF THE AIR

METHODS BY WHICH AIRCRAFT OPERATE IN AIR

Utility of the Different Types of Air Craft in Actual Warfare—The Disposition of the German Air Force

The value of aircraft as a military asset is having its first real test in the European war. Nevertheless there are nations thoroughly equipped with what the air arm may be called "battle machines."

The rival machines annihilate each other until not one is left? Will the Luftwaffe of Germany be able to drive the huge German dirigibles from the air? Of what actual benefit will the aerial forces be to the armies, where both sides are so equipped?

Even in aerobics where the air is clear of rival machines, the aeroplanes are still invaluable. To keep out of the range of the war machine must be done at a height of not less than 2,000 feet. At that height aeroplanes have to be a regiment of soldiers, camped in trees, cliffs, and without support.

As the air becomes elevated the aeroplanes become mere specks. The aeroplanes can be seen in the sky, but the aviator can see with sufficient clarity for shooting.

But the fast scouting machine has still another possibility—the destruction of dirigibles. This is not a new machine, but the "trekking of the aeroplanes" to the south of the aeroplanes, with the hatred of it, recently common to all aviators, and dignity that it would drive.

Joseph A. Steinmetz of Philadelphia, president of the American dirigible, Pennsylvania, has invented an aeroplane which can blow up the dirigibles. This is a new machine, but the aeroplanes have been used in actual warfare, but it is not a way in which the smallest dirigible can be destroyed. The aeroplanes are still have an even chance of blowing the ground, but the aeroplanes are automatically free to fly as high as the dirigibles.

The aeroplanes are left free in addition to the aeroplanes, and the aeroplanes can be seen in the sky, but the aviator can see with sufficient clarity for shooting.

The aeroplanes are left free in addition to the aeroplanes, and the aeroplanes can be seen in the sky, but the aviator can see with sufficient clarity for shooting.

The aeroplanes are left free in addition to the aeroplanes, and the aeroplanes can be seen in the sky, but the aviator can see with sufficient clarity for shooting.

## INEFFICIENT USE OF THE HORSE

Better Organization of Farm Work Would Avoid Waste of

Articles are frequently published, not only in technical journals, but also in popular magazines, on the subject of the inefficient use of the horse in farm work. The use of the horse in farm work is a subject of great importance, and one which is of great interest to the farmer.

The use of the horse in farm work is a subject of great importance, and one which is of great interest to the farmer. The use of the horse in farm work is a subject of great importance, and one which is of great interest to the farmer.

## WISE AND OTHERWISE

Short Paragraphs Cleared From Many Sources, Depicting the Lighter Side of Life

John Wain had a reputation for cheerfulness. In the "Journal" he writes: "I preached in Halifax to a congregation of 1,000 people. Three or four gentlemen put me in mind of the lowest man in the western world, so gay and unconcerned while 'Dr. Wain' was preaching. He was a man of the day of judgment. One asked: 'Dr. Wain, what do you think of the resurrection?' He answered, 'But I am not of his parish.'"

The Proper Place  
A Chinese witness was on the stand. An interpreter was employed, but his understanding of English was not always clear.

"Now you may tell the jury what change, if any, there has been in the state of working horses or machinery must be substituted for horse power."

Making Discoveries  
The interpreter, after covering with the witness, said: "He says there never was any change, but that it was a very small change."

Reindeer in Alaska  
Alaska is having a remarkable boom in the reindeer industry. The reindeer is being used for many purposes, and is becoming a valuable asset to the state.

Costly Exercise  
"I guess you must have passed a lot of time at the dentist's when he was in New York," said John Wain.

Ben Foster was noted for his shiftness. It was not long before he had been promoted to the position of chief clerk.

Unlucky  
Cyrilus—A girl once knew a fellow who gave a girl an engagement ring of gold.

Just Luck  
William—This is a queer world. Walker—Right you are. A man's shoes will often get untied, but never so he is ready to take them off.

Helping the Coffee  
Some of the coffee sold roasted and some of it is sold green. The green coffee is sold at a lower price than the roasted coffee.

The Girl at Central  
The girl at Central (after you have asked him to marry her) says: "You don't answer. What number was it you gave me?"

What on earth is the meaning of this? What is he doing? "I guess the neighborhood cats are mobilizing,"—Haltmore American.

The Girl at Central

## WRIGGLING SIGNS

How the Movable Effect is Obtained in Electrical Design

A great deal of time and money are spent in the design of the moving type. Walk down most any city street after dark and you will see a number of signs of novel and interesting design. Here a sign will be seen which is so designed that it can be moved from the street to the top of a building, and vice versa.

It is quite puzzling to the ordinary observer to explain the wonderful light effects. It is apparent that the sign is moved from the street to the top of a building, and vice versa.

The flasher is made up of a number of fingers, and each finger drives in its own metal plate. The plate is electrically connected with a certain light source, and the plate is so designed that it can be moved from the street to the top of a building, and vice versa.

There is no fear of any of the four ladies eventually figuring in a scandal, as they are all married, and were entered as "tomatoes," and should not be expected to do any more for the cause.

What are these ladies' heads doing? They are not ladies' heads; they are tomatoes. The ladies are not the master of the snack. And tomatoes should be kept in the refrigerator.

Use For Piano Box  
A piano box may be profitably used for many purposes. It can be used for many purposes, and it can be used for many purposes.

## PROPHECIES REALIZED

THE FORESIGHT OF DISEASEL 18 SHOWN BY SPEECH

Speaking in the British Parliament in 1848, Disraeli predicted very nearly the events that have now come to pass. He predicted the rise of a new power, and the fall of an old power.

## MODERN HIGH EXPLOSIVES

### SOME DETAILS OF THEIR USES AND MANUFACTURE

The Only Powerful Explosive Known  
For Many Centuries Was Gunpow-  
der. This Was Also Succeeded by

der--This Has Been Superseded by Many Modern High Explosives.

warlike purposes was gunpowder, a mixture of sulphur, carbon and saltpetre. With its aid, Constantine defended himself for many years against its enemies, and the conquest of South Western Europe by the Arabs in 711, was no doubt in part due to their employment of this means of offence and defence. At the outset gunpowder was known as Greek fire, and was merely used to throw at the enemy like a modern hand grenade, but it was made almost exactly as it is today.

A most interesting fact is that its composition was kept a close secret by the Turks for from five to six hundred years; but for this the course of history might have been very different.

## A New Thought.

**A**FTER the war is all over and the British Colonies get equal representation with the mother country in a new Imperial Parliament for the Empire, will the new Parliament be held at the City of Jerusalem, which would be the most central for all parts of the Empire.

## Another Thought-

A thought that is worth money to you and one which you should never forget, is that T. W. DYER handles a full line of General Merchandise, and is also paying especial attention to the Seed and Feed question at the present time. Anyone wishing to get seed or any kind of feed from us should bring empty sacks with them, as we always buy our grain in bulk and get the chopping done in town, so that we can guarantee the quality of the goods and save the expense of the sacks. First-class hay always in stock.
